Professional Summary:

I am a software engineer, I am frameworks and technology independent, I keep my skills updated and learning Modern technologies, with experience in backend development and basics of front end.

Work Experience:

ordarawy Market 3-2020 until 6-2021 Software Engineer

On Going 7-2021 until Now Python Developer

tuft studios 8-2021 until Now backend Developer (part time)

Some of the work I was a member of:

Ordarawy Market

[Android IOS](#)

- create a service to check whether user address in the available zone we define use Postgres to retrieve data from the database to overcome the slow response of data retrieved from odoo
- combine data retrieved from Postgres and odoo and serialize this data to be used with flutter
- deploy the project with Nginx on VPS

Technology I used:

Python3, Odoo, Fast API, PostgreSQL,

shipping

[Website](#)

an inventory management system that handles products quantities and prices calculation and order status according to delivery

Technology I used:

Django, Java script, Odoo, bootstrab,

ERP Systems

[tbs](#)

create a custom module to handle how KPIs of employees calculated

Technology I used:

XML, Odoo, bootstrab, Git,

e-commerce application

hadn't been release yet

- participate with the business team on which approaches it would be better for us to follow
- custom authentication: create custom OTP that allows only verified users to use the application
- cart: handle calculating products in cart prices and quantities and order total value
- wallet: allow users to pay with their wallet whether the partial or total value
- canceling an order: update products quantities and update user wallet if it was used
- send real-time notifications when order is created successfully
- particpate in deployment process on aws

Technology I used:

Python, Django Rest Framework, Postgresql, Heroku, Firebase, Git, trello,

Some open-source projects

[Blog](#)

Blog in django and integrate with it javascript and pytest

[pytest-django](#)

a simple classroom project to practice using Django Rest Framework and testing using django Test Case and Pytest

proficiency SKills

Skill Level: Professional

Python, Django, Odoo, API development, Django Rest Framework,

Skill Level: Intermediate

Nginx, Postgresql, Mysql, Ability to document technical processes to promote bi-directional knowledge transfer within a team environment.,

TDD(Pytest,factory boy), Linux Server, Git, Debugging, fast API,

Skill Level: basics

Bootstrab4, docker, Firebase, XML, Java Script (React),

Education:

information technology of the advanced academy

Languages

Arabic: Native, English: Upper intermediate,
